The Edison a dynamic two-level design buzzing with five upstairs bedrooms and main level reserved for almost everything else. Chic hardwood flooring glides across the foyer before angling past the staircase and into the expansive great room. More casually, a mudroom entry with bench seating off the two-bay garage reflects daily family life practicality. Both entrances merge at the ready-for-anything kitchen's sophisticated quartz countertops, Huntwood cabinets, and large walk in pantry adjacent to the dining room. Volume continues flowing toward the relaxing great room back-set by an enticing fireplace and a corner-set covered outdoor living area. Upstairs, master suite privacy fills the entire back side of the upper level, where a five-piece bath suite helps you unwind with a free-standing spa tub and quartz-counter double-sink vanity. Four secondary bedrooms wrap around a spectacular leisure loft, open to the foyer below.
