Indulge your sense of space with the three level Dover design. Beyond the entry's deep hallway, the open-flow great room reveals dynamic dimensions. Cozy up next to the fireplace on one side of the generous room, or slide open the glass wall leading to an all-season covered outdoor living area. At the opposite corner, set the dining room for elegant dinner parties — or roll out game-day snacks on the long kitchen island's quartz countertops. A beautiful backsplash, with mosaic tile accents, under Huntwood soft-close cabinets. The mudroom connection leading from the super-large, two-bay garage to stock

up the kitchen-corner pantry. Upstairs, a central landing pivots toward all three secondary bedrooms filling the back of this level. At the front half of the upper level, French doors reveal an exclusive entry to the master suite. Bath amenities highlighting a double-sink vanity with quartz countertops, and sanctuary-soaking stand-alone tub. The enviable master bedroom boasts two separate walk-in closets. The Dover continues to flex its shape on the optional third level, where a bonus room creates limitless potential.
